

Changing the Memory Allocation for Apploader when using extremely large files

1. Install the latest version of Apploader and any patches that may be available to the default directories.
2. Using Windows Explorer, navigate to the directory "C:\AppLoader7.0\bin\launchers"
3. Right click on the Apploader Launch file and open it with Notepad
4. Scroll down to the last line in the launch file script which is:
"cjgreen.app.config.maxMemory=-Xmx256m"
5. Carefully edit this statement to read "cjgreen.app.config.maxMemory=-Xmx512m"
6. Save the edited Launch File (do not "save as" or change formats/file extension)
7. Launch and use Apploader
